

WiSACWIS Update Notice

Assessment

The Assessment functionality in WiSACWIS will be modified for build 3.7 that is scheduled for release on February 24, 2003. The Assessment window does not capture information indicating that there is an independent investigation for the case nor does it capture information indicating if case participants are alleged victims while in legal and/or physical custody of the agency. The Assessment window functionality is being modified to include checkboxes to capture both pieces of information.

Summary of Changes

Assessment window – Allegations tab

The **‘Independent Investigation’** checkbox – The ‘Independent Investigations’ checkbox will be selected by workers when there is an independent investigation for the case. This indicator will allow the State and Counties to keep track of and report on the independent investigations under their jurisdiction.

The **‘Is the alleged victim(s) in Agency legal and/or physical custody?’** checkbox – The ‘Is the alleged victim(s) in Agency legal and/or physical custody?’ checkbox will be selected by workers if one or more participants in the case are alleged victims while in Agency legal and/or physical custody. This indicator will allow the State and Counties to keep track of and report on the independent investigations under their jurisdiction.
